

INTERVENTIONAL RADIOLOGY

THE SURGERY OF THE NEW MILLENNIUM

VASCULAR ACCESS & DIALYSIS CARE

Infusion port placement & removal
PICC line

Hickman and other tunnel catheters

Dialysis Care

Dialysis access catheters placement
Dialysis fistula/graft management
Central venous angioplasty & stents

BACK PAIN & SPINE INTERVENTIONS

Percutaneous Spine fracture management

- Vertebroplasty
- Sacroplasty
- Kyphoplasty

Facet blocks

Nerve blocks

Epidural steroid injection

Blood patch

PERIPHERAL ARTERIAL DISEASE

Consultation: Non-healing wounds, peripheral vascular disease.

Angiograms

Angioplasty

Atherectomy and stent

INTERVENTIONAL ONCOLOGY

Hepatic Tumor Embolization

Radioembolization (Y90)

Chemoembolization

Bland embolization

Percutaneous Ablation

Liver, Kidney, Lung and bone tumors

Port Placement & removal

Tunnel Catheters for effusion

Image guided biopsy

Biliary Interventions

Palliative pain management

Gastrostomy

Prostate artery embolization for BPH

OUT PATIENT CONSULTATION

We run a fully staffed outpatient interventional clinic.

Consultation for evaluation, second opinion, alternative treatments, management and follow up.

In patient consultations at St Rose hospitals at Siena, San Martin and De Lima campuses.

SCREENING ULTRASOUND

Abdominal aortic aneurysm

Carotid disease

Peripheral vascular disease/ABI

WOMEN'S HEALTH

Uterine Fibroid Embolization - Minimally invasive procedure that reduces pain, bleeding, and urinary symptoms of uterine fibroids.

Pelvic congestion

Post-partum hemorrhage

Varicose veins

Breast Imaging & Intervention

NEUROINTERVENTIONAL

Cerebral angiogram

Carotid & vertebral stent

Brain aneurysms

Cerebral AVM & fistulas

Stroke: Mechanical thrombectomy

Epistaxis, Head & Neck tumor embolization

VENOUS DISEASE

Deep Vein thrombosis

IVC filter placement & removal

Venous angioplasty and stent for chronic venous ulcers

Pulmonary embolism

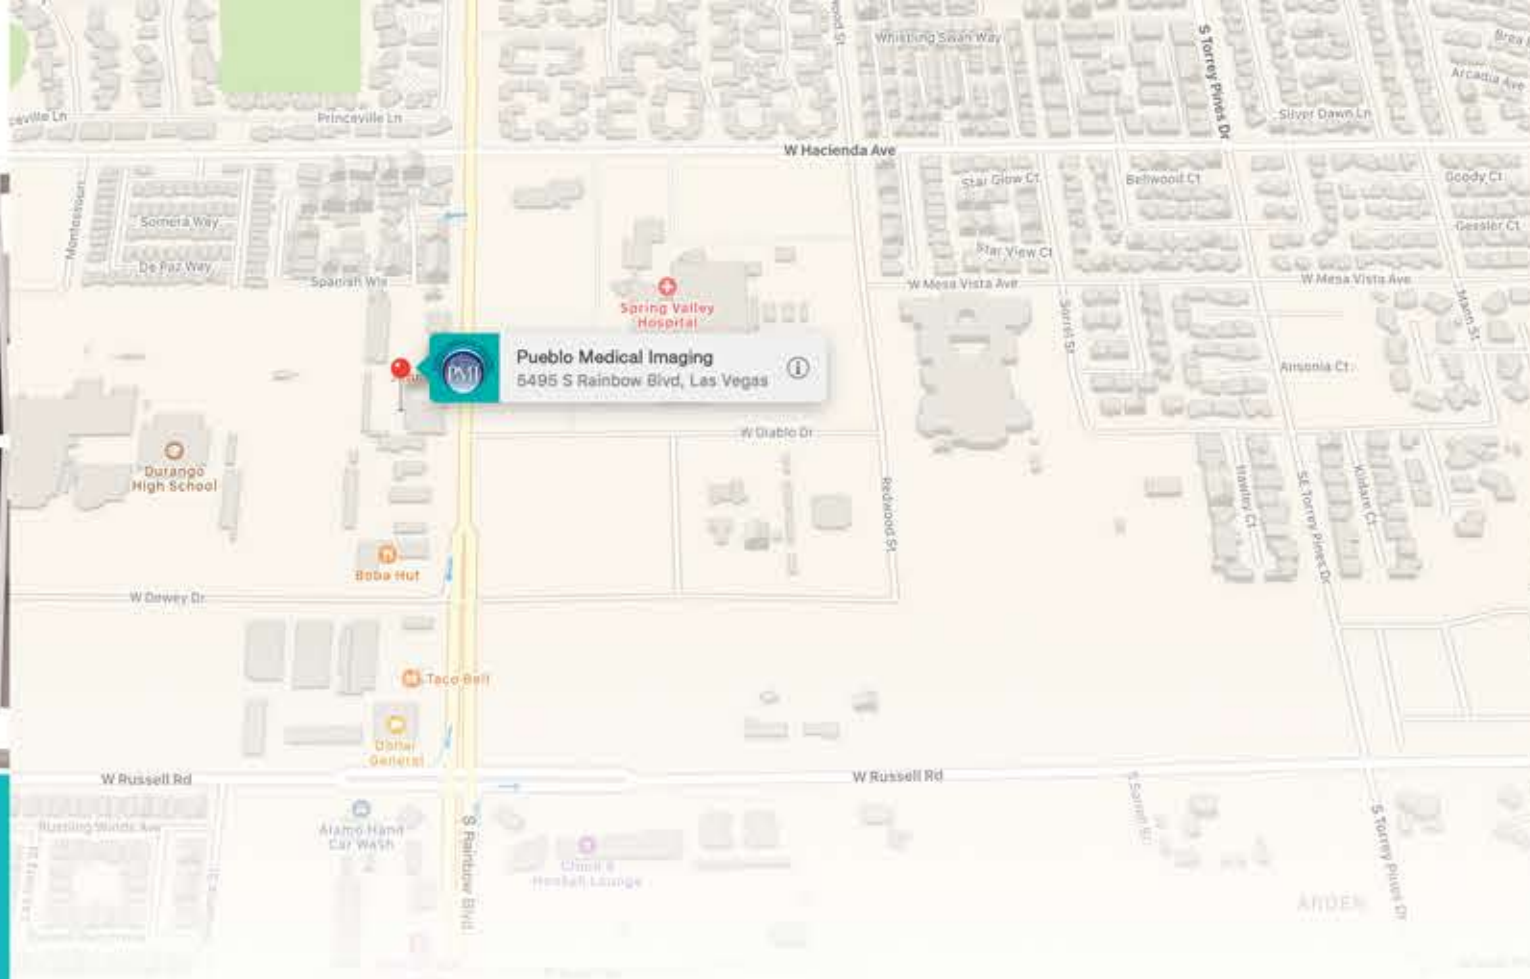

Varicocele

Pelvic congestion

Interventional Radiologists at Radiology Associates of Nevada

We are a group of six fellowship trained interventional and neuro interventional radiologists. We are experienced in complex interventions like brain aneurysms, chemoembolization's, atherectomy for PVD to procedure like port placement and dialysis access management. We take pride in our practice as a clinical service with 24/7 coverage at hospital to fully staffed outpatient clinic for consultation.

We are always a phone call away.

INTERVENTIONAL RADIOLOGY

THE SURGERY OF THE NEW MILLENNIUM

What is Interventional Radiology?

Interventional Radiology is one of the most technologically advanced and fastest growing specialties of modern medicine. As a subspecialty of radiology, IR utilizes image-guidance via ultrasound, x-ray, CT, MRI, and fluoroscopy to perform advanced minimally-invasive procedures in an operating room type setting. Many procedures that once required surgery can be performed by an Interventional Radiologist without general anesthesia or incisions, thus enabling patients to go home the very same day.
